

FLUFFY FLAGS

BY LINDA SIMON

These small 'fluffy flags' are based on the International Code of Signals – a series of flags used by sea-faring vessels to convey warning messages. Each flag holds a specific meaning and is also a letter or number. When used individually or in pairs the combination of flags spell out unique messages.

RULE OF SIX

The flags strung below the DANGER sign are composed of pairs of flags. The meaning of each pair of flag combinations can be read metaphorically to reference feelings or situations experienced during COVID-19.
